Respondent.

Complainant, United States Environmental Protection Agency, Region VIII, and Respondent, Sterling Crane, Inc., by their undersigned representatives, hereby settle the civil cause of action arising out of a spill of unleaded gasoline (oil) that occurred on November 23, 2005, and agree as follows:

The Clean Water Act (the Act), as amended, authorizes the Administrator of EPA to assess administrative penalties against any person who discharges oil into or upon the navigable waters and adjoining shorelines of the United States in quantities that have been determined may be harmful to the public health or welfare or environment of the United States. 33 U.S.C. § 1321(b)(6)(B)(i) and (b)(3). This determination includes discharges of oil that (1) violate applicable water quality standards, (2) cause a film, sheen, or discoloration of the surface of the water or the adjoining shorelines, or (3) cause a sludge or emulsion to be deposited beneath the surface of the water or the adjoining shoreline. 40 C.F.R. § 110.3. This authority has been properly delegated to the undersigned EPA official.

Respondent admits that on November 23, 2005, there was a discharge of 100 gallons of diesel fuel and hydraulic fluid into or upon the Colorado River and/or adjoining shorelines from its vehicle, in Mesa County, Colorado.

Respondent's vehicle's discharge caused a sheen upon or discoloration of the surface of the Colorado River and/or adjoining shorelines.
